REVISION : A

TITLE: How to Flash the firmware?

INITIATE BY: Manolo
APPROVED BY: Gary Chen

1.0 Purpose

If there's any new firmware. You are able to update the D12 through SD card or Micro SD card

2.0 Scope

This document covers D12/230/300/400/500.

3.0 Download and install the firmware.

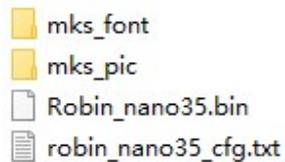

3.1 Download the firmware from Wanhao3dprinter.com---Software download.

Make sure you have downloading the corresponding firmware.

2. Firmware for printer.

3.1 Unzip the file can copy into your SD card or Micro SD card.

3.2 Insert the SD card or Micro SD card into the printer card reader.

3.3. Turn on the printer. The printer would start flashing automatically. After finishing flashing, printer would come back to starting screen as below. Please delete firmware inside SD card.
